EXPERIENCE

Intern Full Stack Developer

Profound Edutech

📅 03/2023 - Present 📍 Nashik, Maharashtra

Profound Edutech IT Training Powerhouse, Merging Knowledge and Industry Needs. Bridging Academia and IT Demands with Expert Faculty.

- Developed a MERN stack project, integrating MongoDB, Express.js, React, and Node.js to create a robust application.
- Designed and implemented responsive user interfaces using HTML, CSS, and JavaScript for enhanced user experience.
- Applied agile methodologies, ensuring efficient project management and timely delivery of milestones.
- Learned about faster and better ways to build apps and how to manage changes in the project.

PROJECTS

E-Commerce Website (Shopnow)

🌐 <https://shopnow-delta.vercel.app/>

- creation of 'ShopNow' using React JS, Node.js, Express, and MongoDB for a smooth shopping experience
- Made sure the website's backend (Node.js, Express, MongoDB) handled data well.
- Added important stuff like user logins, managing product lists, carts.
- Created an admin panel to easily handle products and grow the website.
- create a scalable, industry-standard e-commerce platform with full responsiveness across all devices.
- Upcoming Enhancements:**
- Payment Gateway Integration: Ensuring secure and seamless transactions.

Sundown Studio

🌐 <https://rupeshsutarofficial.github.io/Sundown-Studio-Web/>

- Smooth Animations: Sundown Studio's website is designed using HTML, CSS, and JavaScript, employing libraries like Locomotive.js for creating smooth and captivating animations.
- Swiper.js Integration: The website utilizes Swiper.js, a powerful JavaScript library, to create seamless and interactive sliders for showcasing content.
- Full Mobile Responsiveness: Every aspect of the website has been optimized to ensure flawless functionality and aesthetics across various mobile devices.
- Smooth Scrolling: Users navigate effortlessly through the website thanks to smooth scrolling functionality, providing a seamless browsing experience.

Cynthia Ugwu Clone

🌐 <https://rupeshsutarofficial.github.io/Cynthia-Ugwu-Clone/>

- Developed a website using HTML, CSS, and JavaScript.
- Implemented smooth animations and scrolling for a seamless user experience.
- Inspired by Cynthia Ugwu, incorporated captivating text effects for visual appeal.
- Utilized Locomotive JS and GSAP for enhanced functionality and dynamic animations.
- Optimized performance through code and resource optimization for fast loading.
- Checked cross-browser compatibility for a consistent experience across different browsers.
- This recognition on Awwwards serves as a testament to the website's excellence in design, smooth animations, and captivating user experience.
